

Hello Tech Lab Students and Parents TK-5!

I hope all of you are staying safe and enjoying time spent with your family. It was a crazy way to end the school year, but I hope to be able to connect with you through email or posting on my Facebook page.

Like your classroom teachers, I have put together a few worksheets for you to work on. I hope you enjoy them!

If you are able to access the Internet, I have a couple of ways to provide access to fun websites, videos, STEM activities and directions. You can go to my Facebook page: Shepherd and Winn Elementary Tech Lab, where at the top I will have a link to my class website. On the website's home page you will see links to all grade level resources. For certain activities, I would LOVE to have you post a picture or video in the comment section of certain activities on Facebook. My hope is for you to have fun with all of it. Third through fifth graders, PLEASE keep practicing your keyboarding!! 😊

If you have any questions, please do not hesitate to email me:
